

Tacton CPQ Subscription Pricing

The Challenge

Whether selling equipment as a service or starting with basic hardware plus services bundles, the quoting process can be difficult. Aligning on the correct service contract for equipment is slow and costly. This makes matching configurations and services a challenge.

Our Solution

Tacton CPQ Subscription Pricing empowers manufacturers to configure a complete, and optimal solution – including complex industrial equipment, accessories, and subscription-based services – in one powerful, CPQ system.

Features and Benefits

Always offer the correct and optimal service contract specific configured equipment

Combine one-time, recurring, and usage-based charges to optimize your service pricing

Configure a complete solution including subscription-based services

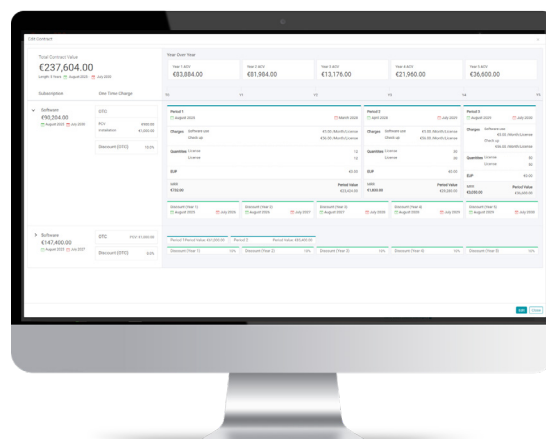

Forecast monthly recurring revenue (MRR) and annual recurring revenue (ARR)

Key Use Cases

CPQ Subscription Pricing

- Negotiate proposals with individual service contract lengths, periodization, and committed and uncommitted license quantity and discount ramps
- Visualize payment plans including Total Contract Value (Total Net Price), Total Price of Equipment (CAPEX), and Total Subscription Price (OPEX)
- Forecast predictable revenue for you, and predictable costs for your customers

Tacton CPQ Subscription Pricing
